

Safety Data Sheet

According to Regulation (EC) No. 1272/2008, Regulation (EC) 1907/2006

1. Identification of the substance/mixture and of the responsible company

1.1. Product Identifier: Vinyl Acetate Monomer (CH₃COOCH=CH₂)

Other names/synonyms: Acetic acid vinyl ester; Vinyl acetate; Vinyl A monomer; VyAc; 1-Acetoxyethylene; CH₃C02Ch=CH₂; Ethenyl acetate; Ethenyl ethanoate; Acetate de vinyle; Ethanoic acid, ethenyl ester; Octan winylu; Vinile (acetate di); Vinyl acetate h.q.; Vinyl ethanoate; Vinylacetaat; Vinylacetat; Vinyle (acetate de); Zeset T; Acetic acid, ethylene ether; UN 1301; VAC; Vinile; Vinyle; Vinylester kyseliny octove; Vinyl ester of acetic acid

1.2. Relevant identified uses of the substance or mixture and uses advised against:

Identified uses: Chemical for synthesis; used in polyvinyl acetate, adhesives, floor tiling, water-based emulsion paints and elastomers

1.3. Details of the supplier of the safety data sheet:

International Vinyl Acetate Company (IVC)
PO Box 12021
Post Coe 31961
Jubail Industrial City
Kingdom of Saudi Arabia

Website: www.sipchem.com/en/affiliates4.htm

1.4. Emergency telephone number: 00966-359 9985 (24 hours)

2. Hazards Identification

Vinyl Acetate Monomer CAS 108-05-04 Purity: 99.90% minimum
 Hydroquinone CAS 123-31-9, as a stabilizer; 3-17 ppm
 Trace Impurities: Acetaldehyde 100 ppm Max., Acetic acid: 50ppm Max, water 400ppm Max

2.1. Classification of the substance or mixture:

Classification of Labeling in accordance with the CLP Regulations:

Index No	International Chemical Identification	EC No	CAS No	Classification		Labeling			Specific Conc. Limits, M-factors	Notes
				Hazard Class and Category Code(s)	Hazard statement Code(s)	Pictogram Signal Word Code(s)	Hazard Statement Code(s)	Suppl. Hazard statement Code(s)		
607-023-00-0	Vinyl Acetate	203-545-4	108-05-4	Carc. 2 Flam. Liq. 2 (currently in annex VI) Acute Tox. 4 STOT SE 3	H351 H225 H332 H335	GHS02 GHS07 GHS08 Dgr	H351 H225 H332 H335			D (currently in Annex VI)

Classification & Labeling in accordance with Directive 67/548/EEC:

Index No	International Chemical Identification	EC No	CAS No	Classification	Labeling	Concentration Limits	Notes
607-023-00-0	Vinyl acetate	203-545-4	108-05-4	Carc. Cat. 3; R40 F; R11 (currently in Annex VI) Xn; R20 Xi; R37	F; Xn R: 11-20-37-40 S: (2-) 36/37-46		D (currently in Annex VI)

Classification according to Regulation 1272/2008/EC (CLP)

Basis for Classification This substance is classified based on Directive 1272/2008/EC and its amendments (CLP Regulation, GHS)

GHS Classification

Hazards

Flammable liquid
Acute inhalation toxicity
Carcinogenicity
Specific target organ systemic toxicity (single exposure)

Category

Category 2
Category 4
Category 2
Category 3

Symbols

Signal Word

Hazard Statements

Danger

H225 - Highly flammable liquid and vapor
H332 - Harmful if inhaled
H335 - May cause respiratory irritation
H351 - Suspected of causing cancer

Precautionary Statements

P201 - Obtain special instructions before use
P202 - Do not handle until all safety precautions have been read and understood
P210 - Keep away from heat/sparks/open flames/hot surfaces. - No smoking
P235 - Keep cool
P240 - Ground/bond container and receiving equipment
P241 - Use explosion-proof electrical/ ventilating/ lighting/ equipment
P242 - Use only non-sparking tools
P243 - Take precautionary measures against static discharge
P261 - Avoid breathing dust/ fume/ gas/ mist/ vapors/ spray
P271 - Use only outdoors or in a well-ventilated area
P281 - Use personal protective equipment as required
P303 + P361 + P353 - IF ON SKIN (or hair): Remove/ Take off immediately all contaminated clothing. Rinse skin with water/ shower
P304 + P340 - IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing
P308 + P313 - IF exposed or concerned: Get medical advice/ attention
P312 - Call a POISON CENTER or doctor/ physician if you feel unwell
P370 + P378 - In case of fire: Use water spray for extinction
P403 + P233 - Store in a well-ventilated place. Keep container tightly closed
P405 - Store locked up
P501 - Dispose of contents/container in accordance with local regulations

Other Hazards The substance does not meet the criteria for PBT / vPvB according to REACH, Annex XIII

SAFETY DATA SHEET

Emergency overview: DANGER! EXTREMELY FLAMMABLE LIQUID AND VAPOR. FLAMMABLE. VAPOR MAY CAUSE FLASH FIRE. CAUSES RESPIRATORY TRACT AND EYE IRRITATION. MAY CAUSE SKIN IRRITATION. MAY CAUSE TARGET ORGAN DAMAGE, BASED ON ANIMAL DATA. POSSIBLE CANCER HAZARD – MAY CAUSE CANCER, BASED ON ANIMAL DATA.

Potential chronic health effects:

CARCINOGENIC EFFECTS:	Classified A3 (proven for animals) by ACGIH 2B (possible for humans) by IARC Risk of Cancer depends on duration and level of exposure.
MUTAGENIC EFFECTS:	No known significant effects or critical hazards.
REPRODUCTION TOXICITY:	No known significant effects or critical hazards.

2.2. Label: See table above.

2.3. Other hazards: None known.

3. Composition/information on ingredients

Formula	C ₄ H ₆ O ₂
CAS-No.	108-05-4
Index-No.	607-023-00-0
EC-No.	203-545-4

4. First Aid Measures

4.1. Description of first aid measures

Eye Contact: Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

Skin Contact: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately.

Inhalation: Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

Ingestion: Wash out mouth and water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

4.2. Most important symptoms and effects, both acute and delayed:

Dizziness, Gastrointestinal disturbance, and drowsiness. Drying-out effect resulting in rough and chapped skin.

4.3. Indication of immediate medical attention and special treatment needed:

No additional information available.

5. Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media: Use dry chemical, CO₂, water spray (fog) or foam

Unsuitable extinguishing media: Do not use a water jet.

5.2. Special hazards arising from the substance or mixture:

Extremely flammable liquid. In a fire or if heated, a pressure increase will occur and the contain may burst, with risk of subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.

5.3. Advice for fire fighters:

Special protective equipment for fire fighters: Fire fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Further information: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving an personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. Do not allow fire extinguishing water to contaminate surface or groundwater systems.

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures:

Advice for non-emergency personnel: Evacuate the danger zone; follow emergency precautions. Secure emergency assistance immediately. Avoid contact with the material; do not breath vapors or aerosol. If possible, provide additional ventilation.

Advice for emergency responders: Do not take action without proper training and emergency equipment. See Section 8 for additional information. Evacuate surrounding areas. Eliminate all ignition sources including flares and all open flames. Avoid all contact with spiller material. Maintain adequate ventilation and wear appropriate respiratory protection.

6.2. Environmental precautions:

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

6.3. Methods and materials for containment:

Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, surface waters, basements or confined areas. Wash spillage into effluent treatment plant. Contain and collect spillage using appropriate personal protective equipment. Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products or if a risk assessment indicates this is necessary. Collect and contain spillage with non-combustible, absorbent material (e.g. sand, earth, vermiculite or diatomaceous earth) and place in a container for disposal according to local regulations. Use spark-proof tools and explosion proof equipment. Contaminated absorbent material may pose the same hazard(s) as the spilled product.

6.4. Reference to other sections:

See disposal instruction 13 and exposure controls Section 8.

7. Handling and storage

7.1. Precautions for safe handling:

Observe all label precautions. Use appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on protection against fire and explosion: Keep away from flames and sources of ignition – including static.

7.2. Conditions for safe storage, including any incompatibilities:

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

7.3. Specific end uses:

No other additional special end uses are anticipated.

8. Exposure controls/personal protection

8.1. Control parameters:

Personal, workplace or environmental monitoring may be necessary to ensure exposures are below recommended and legal limits.

Exposure limits:

ACGIH TLV (United States, 1/2009)

STEL: 53 mg/m³ 15 minute(s)

STEL: 15 ppm 15 minute(s)

TWA: 35 mg/m³ 8 hour(s)

TWA: 10 ppm 8 hour(s)

NIOSH REL (United States, 6/2009)

CEIL: 15 mg/m³ 15 minute(s)

CEIL: 4 ppm 15 minute(s)

OSHA PEL 1989 (United States, 3/1989)

STEL: 60 mg/m³ 15 minute(s)

STEL: 20 ppm 15 minute(s)

TWA: 30 mg/m³ 8 hour(s)

TWA: 10 ppm 8 hour(s)

EC Exposure Limit Values

EU TWA: 17.6 mg/m³ (5 ppm) 8 hour(s)

EU STEL: 35.5 mg/m³ 10 ppm) 15 minute(s)

Germany has a national OEL of 18 mg/m³ (5 ppm). The maximum allowable concentration (MAC's) for Australia, Belgium, Finland, the Netherlands, Sweden and Switzerland for vinyl acetate is 30 mg/m³ (10 ppm). The MAC in the USSR, Poland, and Yugoslavia is 10 mg/m³ (2.8 ppm). The Romanian limits consist of avg. and max concentration of 50 and 100 mg/m³ (14 and 28 ppm).

8.2. Exposure controls:

Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Engineering measures: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Individual protection measures:

Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Discard contaminated clothing or wash thoroughly before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.

Hand protection: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is required.

Splash contact:

Glove material: butyl rubber

Glove thickness: 0.7 mm or thicker

Break through time: > 240 minutes

Other protective equipment: Flame retardant antistatic protective clothing

Respiratory protection: A properly fitted air purifying respirator or air supply respirator should be worn if a risk assessment indicates that respiratory protection is necessary. Respirator selection must be based upon known or measured levels of exposure.

Environmental exposure controls: Ventilation and engineering controls to protect workers and ventilate work area to at or below recommended employee exposure levels. Technical measures are preferred over use of personal protective equipment. Environmental

controls, such as scrubber or thermal oxidizer may be required to prevent process releases to the atmosphere. Do not empty into drains—risk of explosion.

9. Physical and chemical properties

9.1. Information on basic physical and chemical properties:

Physical State: Liquid.

Color: Colorless

Odor: Pleasant fruity odor

Melting point: -93°C

Boiling point: 71-73°C (at 1.013hPa, Method: DIN 51755)

Flash point: -8°C

Lower explosion limit: 2.6% (V)

Upper explosion limit: 13.4% (V)

Critical temperature: 252° C

Relative density: 0.93 g/cm³ at 20° C

Water solubility: 20 g/l at 20° C

Partition coefficient: n-octanol/water: log Pow 0.73 (bioaccumulation not expected)

Viscosity: 0.43 mPa s at 20° C

VOC content: 100% (w/w)

10. Stability and reactivity

10.1. Reactivity:

Vinyl acetate monomer reacts with polymerization initiators: hydrogen peroxide, oxygen and peroxy compounds. Maintain hydroquinone inhibitors during storage and handling to prevent exothermic reactions.

10.2. Chemical stability:

The product will react with heat, moisture and light (light sensitive). Hydroquinone is added as a stabilizer to prevent polymerization or hazardous reactions.

10.3. Possibility of hazardous reactions:

Vinyl acetate monomer reacts exothermically with aldehydes, aluminum oxide, strong alkalis, toluene, water and acids.

10.4. Conditions to avoid:

Avoid heat, exposure to light, and warming product in storage to near product flash point.

10.5. Incompatible materials:

Unstabilized product is highly reactive with oxidizing materials, acids, alkalis and moisture.

10.6. Hazardous decomposition products:

Under normal conditions of storage and use, hazardous decomposition products should not be produced. Peroxides may be produced under uncontrolled fire conditions.

11. Toxicological information

11.1. Information on toxicological effects:

<u>Acute oral toxicity</u> LD50 rat:	2900 mg/kg (RTECS)
<u>Acute inhalation toxicity:</u>	13.1 mg/kg 4 hours (IUCLID)
<u>Acute dermal toxicity</u> LD50 rabbit:	2.335 mg/kg (RTECS)
<u>Skin irritation:</u>	Drying of skin noted
<u>Genotoxicity in vitro:</u>	
Ames test:	negative (OECD Test Guideline 471)
Mutagenicity (mammal cell test):	positive (IUCLID)
<u>Specific target organ toxicity - single exposure:</u>	The substance is not classified as a specific target organ toxicant, single exposure.
<u>Specific target organ toxicity - repeated exposure:</u>	The substance is not classified as a target organ toxicant, repeated exposure.
<u>Aspiration hazard:</u>	No information available

11.2. Additional information:

After uptake of large quantities:

Systemic effects:	Dizziness, drowsiness; absorption can result in damage to liver and kidney.
Effect potentiated by:	Ethanol
Further data:	Handle using good occupational and environmental health practices.

12. Ecological information

12.1. Toxicity

<u>Toxicity in fish LC50:</u>	14 mg/l (ECOTOX: 96 hour, fathead minnow)
<u>Toxicity to daphnia and other aquatic invertebrates:</u>	330 mg; (IUCLID: 24 hour, water fleas)

12.2. Persistence and degradability:

 Readily biodegradable 82% (OECD Test Guideline 301C, 14 day)

12.3. Bio accumulative potential:

 Not expected (experimental log Pow: 0.73)

12.4. Mobility in soil:

 No information available.

12.5. Results of PBT and vPvB assessment:

 Assessment not available.

12.6. Other adverse effects:

 No additional environmental adverse effects are known.

Additional ecological information: Do not allow product to enter surface waters, wastewater or soil.

13. Disposal considerations

Waste treatment methods: The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

14. Transport Information

The transport regulations are cited according to international and/or harmonized transport regulations. Possible national deviations and country specific requirements are not considered.

Globally Harmonized System of Classification and Labelling (GHS)

The listed component(s) of this material have been checked for country-specific published classifications according to the Globally Harmonized

System of Classification and Labelling (GHS). The results of the queries are displayed below. Please see the individual country listings, as additional interpretations or reference information may be available.

Australia GHS Classifications

No published information available. This material may be hazardous according to published criteria for classification.

European Union GHS Classifications

Classifications below according to Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures (CLP).

VINYL ACETATE (108-05-4)

Flammable liquids - Category 2 **H225** Highly flammable liquid and vapour.

European Union GHS Labelling Information

Labelling information below is according to Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures (CLP).

VINYL ACETATE (108-05-4) Symbol(s):

Signal Word: Danger

Hazard(s):

H225: Highly flammable liquid and vapour

Prevention:

P233: Keep container tightly closed.

P210: Keep away from heat/sparks/open flames/hot surfaces. - No smoking.

P240: Ground/Bond container and receiving equipment.

P241: Use explosion-proof electrical/ventilating/lighting/.../equipment.

P242: Use only non-sparking tools.

P243: Take precautionary measures against static discharge.

P280: Wear protective gloves/protective clothing/eye protection/face protection.

Response:

P303+P361+P353: IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

P370+P378: In case of fire: Use ... for extinction.

Storage:

P403+P235: Store in a well-ventilated place. Keep cool.

Disposal:

P501: Dispose of contents/container to ...

Japan GHS Classifications

Classifications below published under Japan's Chemicals Classification Program according to the Globally Harmonized System of Classification Labelling of Chemicals (GHS).

VINYL ACETATE (108-05-4)

Flammable liquids - Category 2 **H225** Highly flammable liquid and vapour. Self-reactive substances and mixtures - Type G

Acute toxicity - Inhalation - Vapour - Category 4 **H332** Harmful if inhaled. Skin corrosion/irritation - Category 2 **H315** Causes skin irritation.

Serious eye damage/eye Irritation - Category 2A **H319** Causes serious eye irritation.

Germ cell mutagenicity - Category 2 **H341** Suspected of causing genetic defects.

Carcinogenicity - Category 2 **H351** Suspected of causing cancer.

Specific target organ toxicity - Single exposure - Category 3 **H335** May cause respiratory irritation.

Specific target organ toxicity - Single exposure - Category 3 **H336** May cause drowsiness or dizziness.

Specific target organ toxicity - Repeated exposure - Category 2 **H373** May cause damage to respiratory system through prolonged or repeated exposure.

Hazardous to aquatic environment - acute hazard - Category 2 **H401** Toxic to aquatic life.

Japan GHS Labelling Information

Labelling information below according to classifications published by Japan's Chemicals Classification Program according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS).

VINYL ACETATE (108-05-4) Symbol(s):

Signal Word: Danger

Hazard(s):

H225: Highly flammable liquid and vapour

H332: Harmful if inhaled

H315: Causes skin irritation

H319: Causes serious eye irritation

H341: Suspected of causing genetic defects

H351: Suspected of causing cancer

H335: May cause respiratory irritation

H336: May cause drowsiness or dizziness

H373: May cause damage to organs through prolonged or repeated exposure

H401: Toxic to aquatic life

Prevention:

P233: Keep container tightly closed.

P210: Keep away from heat/sparks/open flames/hot surfaces. - No smoking.

P240: Ground/Bond container and receiving equipment.

P241: Use explosion-proof electrical/ventilating/lighting/.../equipment.

P242: Use only non-sparking tools.

P243: Take precautionary measures against static discharge.

P271: Use only outdoors or in a well-ventilated area.

P280: Wear protective gloves/protective clothing/eye protection/face protection.

P260: Do not breathe dust/fume/gas/mist/vapours/spray.

P264: Wash ... thoroughly after handling.

P201: Obtain special instructions before use.

P202: Do not handle until all safety precautions have been read and understood.

P273: Avoid release to the environment.

Response:

P308+P313: IF exposed or concerned: Get medical advice/attention.

P304+P340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P312: Call a POISON CENTER or doctor/physician if you feel unwell.

P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P337+P313: If eye irritation persists: Get medical advice/attention.

P302+P352: IF ON SKIN: Wash with plenty of soap and water.

P303+P361+P353: IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

P362+P364: Take off contaminated clothing and wash it before reuse.

P332+P313: If skin irritation occurs: Get medical advice/attention.

P312: Call a POISON CENTER or doctor/physician if you feel unwell.

P321: Specific treatment (see ... on this label).

P370+P378: In case of fire: Use ... for extinction.

Storage:

P403+P233: Store in a well-ventilated place. Keep container tightly closed.

P403+P235: Store in a well-ventilated place. Keep cool.

P405: Store locked up.

Disposal:

P501: Dispose of contents/container to ...

Korea GHS Classifications (SV)

Classifications below published by Korea's Ministry of Environment (MOE), Ministry of Employment and Labor (MOEL) or Office of National Emergency Management (NEMA, physical hazards only).

VINYL ACETATE (108-05-4)

MOEL: Flammable liquids - Category 2 **H225** Highly flammable liquid and vapour.

Acute toxicity - Inhalation - Vapour - Category 4 **H332** Harmful if inhaled.

Serious eye damage/eye Irritation - Category 2A **H319** Causes serious eye irritation.

Skin sensitizers - Category 1 **H317** May cause allergic skin reaction.

Germ cell mutagenicity - Category 2 **H341** Suspected of causing genetic defects.

Carcinogenicity - Category 2 **H351** Suspected of causing cancer.

Specific target organ toxicity - Single exposure - Category 3 **H335** May cause respiratory irritation.

Specific target organ toxicity - Repeated exposure - Category 2 **H373** May cause damage to respiratory system through prolonged or repeated exposure.

NEMA: Flammable liquids - Category 2 **H225** Highly flammable liquid and vapour.

Korea GHS Labelling Information

Labelling information below according to classifications published by Korea's Ministry of Environment (MOE), Ministry of Employment and Labor (MOEL) or Office of National Emergency Management (NEMA, physical hazards only).

VINYL ACETATE (108-05-4) Symbol(s):**Signal Word:** Danger**Hazard(s):****H225:** Highly flammable liquid and vapour**H332:** Harmful if inhaled**H319:** Causes serious eye irritation**H317:** May cause allergic skin reaction**H341:** Suspected of causing genetic defects**H351:** Suspected of causing cancer**H335:** May cause respiratory irritation**H373:** May cause damage to organs through prolonged or repeated exposure**Prevention:****P233:** Keep container tightly closed.**P210:** Keep away from heat/sparks/open flames/hot surfaces. - No smoking.**P240:** Ground/Bond container and receiving equipment.**P241:** Use explosion-proof electrical/ventilating/lighting/.../equipment.**P242:** Use only non-sparking tools.**P243:** Take precautionary measures against static discharge.**P271:** Use only outdoors or in a well-ventilated area.**P272:** Contaminated work clothing should not be allowed out of the workplace.**P280:** Wear protective gloves/protective clothing/eye protection/face protection.**P260:** Do not breathe dust/fume/gas/mist/vapours/spray.**P264:** Wash ... thoroughly after handling.**P201:** Obtain special instructions before use.

P202: Do not handle until all safety precautions have been read and understood.

Response:

P308+P313: IF exposed or concerned: Get medical advice/attention.

P304+P340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P312: Call a POISON CENTER or doctor/physician if you feel unwell.

P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P337+P313: If eye irritation persists: Get medical advice/attention.

P302+P352: IF ON SKIN: Wash with plenty of soap and water.

P303+P361+P353: IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

P362+P364: Take off contaminated clothing and wash it before reuse.

P333+P313: If skin irritation or rash occurs: Get medical advice/attention.

P312: Call a POISON CENTER or doctor/physician if you feel unwell.

P321: Specific treatment (see ... on this label).

P370+P378: In case of fire: Use ... for extinction.

Storage:

P403+P233: Store in a well-ventilated place. Keep container tightly closed.

P403+P235: Store in a well-ventilated place. Keep cool.

P405: Store locked up.

Disposal:

P501: Dispose of contents/container to ...

Symbol(s):

Signal Word: Danger

Hazard(s):

H225: Highly flammable liquid and vapour

Prevention:

P233: Keep container tightly closed.

P210: Keep away from heat/sparks/open flames/hot surfaces. - No smoking.

P240: Ground/Bond container and receiving equipment.

P241: Use explosion-proof electrical/ventilating/lighting/.../equipment.

P242: Use only non-sparking tools.

P243: Take precautionary measures against static discharge.

P280: Wear protective gloves/protective clothing/eye protection/face protection.

Response:

P303+P361+P353: IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

P370+P378: In case of fire: Use ... for extinction.

Storage:

P403+P235: Store in a well-ventilated place. Keep cool.

Disposal:

P501: Dispose of contents/container to ...

New Zealand GHS Classifications

Classifications below according to the Environmental Risk Management Authority's (ERMA) Hazardous Substances and New Organisms (HSNO) Act, as amended.

VINYL ACETATE (108-05-4) Approval: HSR001235

Flammable liquids - Category 2 **H225** Highly flammable liquid and vapour.

Acute toxicity - Oral - Category 4 **H302** Harmful if swallowed.

Acute toxicity - Dermal - Category 4 **H312** Harmful in contact with skin.

Acute toxicity - Inhalation - Category 3 **H331** Toxic if inhaled.

Skin corrosion/irritation - Category 2 **H315** Causes skin irritation.

Serious eye damage/eye Irritation - Category 2A **H319** Causes serious eye irritation.

Germ cell mutagenicity - Category 1 **H340** May cause genetic defects.

Carcinogenicity - Category 2 **H351** Suspected of causing cancer.

Reproductive Toxicity - Category 2 **H361** Suspected of damaging fertility of the unborn child.

Specific target organ toxicity - Repeated exposure - Inhalation - Category 2 **H373** May cause damage to respiratory tract through prolonged or repeated exposure if inhaled.

Hazardous to aquatic environment - acute hazard - Category 2 **H401** Toxic to aquatic life.

Hazardous to aquatic environment - acute hazard - Category 3 **H402** Harmful to aquatic life.

Terrestrial Vertebrate Ecotoxicity - Category 3 **H433** Harmful to terrestrial vertebrates.

New Zealand GHS Labelling Information

Labelling information below according to classifications published by New Zealand's Environmental Risk Management Authority's (ERMA) Hazardous Substances and New Organisms (HSNO) Act, as amended.

VINYL ACETATE (108-05-4) Symbol(s):

Signal Word: Danger

Hazard(s):

H225: Highly flammable liquid and vapour

H302: Harmful if swallowed

H312: Harmful in contact with skin

H331: Toxic if inhaled

H315: Causes skin irritation

H319: Causes serious eye irritation

H340: May cause genetic defects

H351: Suspected of causing cancer

H361: Suspected of damaging fertility or the unborn child

H373: May cause damage to organs through prolonged or repeated exposure

H401: Toxic to aquatic life

H402: Harmful to aquatic life

H433: Harmful to terrestrial vertebrates

Prevention:

P233: Keep container tightly closed.

P210: Keep away from heat/sparks/open flames/hot surfaces. - No smoking.

P240: Ground/Bond container and receiving equipment.

P241: Use explosion-proof electrical/ventilating/lighting/.../equipment.

P242: Use only non-sparking tools.

P243: Take precautionary measures against static discharge.

P271: Use only outdoors or in a well-ventilated area.

P280: Wear protective gloves/protective clothing/eye protection/face protection.

P260: Do not breathe dust/fume/gas/mist/vapours/spray.

P264: Wash ... thoroughly after handling.

P201: Obtain special instructions before use.

P202: Do not handle until all safety precautions have been read and understood.

P270: Do not eat, drink or smoke when using this product.

P273: Avoid release to the environment.

Response:

P308+P313: IF exposed or concerned: Get medical advice/attention.

P304+P340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P311: Call a POISON CENTER or doctor/physician.

P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P337+P313: If eye irritation persists: Get medical advice/attention.

P302+P352: IF ON SKIN: Wash with plenty of soap and water.

P312: Call a POISON CENTER or doctor/physician if you feel unwell.

P303+P361+P353: IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

P362+P364: Take off contaminated clothing and wash it before reuse.

P332+P313: If skin irritation occurs: Get medical advice/attention.

P301+P312: IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.

P321: Specific treatment (see ... on this label).

P330: Rinse mouth.

P370+P378: In case of fire: Use ... for extinction.

Storage:

P403+P233: Store in a well-ventilated place. Keep container tightly closed.

P403+P235: Store in a well-ventilated place. Keep cool.

P405: Store locked up.

Disposal:

P501: Dispose of contents/container to ...

South Africa GHS Classifications

Information below presented according to the South African Bureau of Standards (SANS 10234:2008 - Globally Harmonized System (GHS) of Classification and Labelling of Chemicals). The information below identifies substances with recommended GHS classifications by CAS or RR numbers and chemical names; the data field contains the word "Present" along with any clarifying information in parenthesis.

VINYL ACETATE (108-05-4)

Listing: Present

Taiwan GHS Classifications

Information below presented according to Taiwan's Bureau of Standards, Metrology and Inspection (BSMI) of the Ministry of Economic Affairs. This agency has published a series of standards (CNS 15030 1-27 Chemical Classification and Labelling) which provide guidance on classification and labelling of chemicals according to GHS.

VINYL ACETATE (108-05-4)

Taiwan:

Flammable liquids - Category 2 **H225** Highly flammable liquid and vapour.

Acute toxicity - Oral - Category 5 **H303** May be harmful if swallowed.

Acute toxicity - Inhalation - Category 4 **H332** Harmful if inhaled.

Skin corrosion/irritation - Category 3 **H316** Causes mild skin irritation.

Serious eye damage/eye Irritation - Category 2A **H319** Causes serious eye irritation.

Carcinogenicity - Category 2 **H351** Suspected of causing cancer.

Specific target organ toxicity - Repeated exposure - Category 2 **H373** May cause damage to organs through prolonged or repeated exposure.

Hazardous to aquatic environment - acute hazard - Category 3 **H402** Harmful to aquatic life.

15.2. Chemical Safety Assessment:

Sipchem has not conducted a chemical safety assessment for this product.
Refer to ECHA Committee for Risk Assessment vinyl acetate opinion, adopted 10 June 2011.

16. Other information

16.1. Training Advice:

Provide safety information, instruction and training to operators handling vinyl acetate monomer.

The information and recommendations herein are taken from data contained in independent, industry recognized references. Although reasonable care has been taken in the preparation of the information herein, Sipchem and International VinylAcetate Company. make no guarantee, warranty (express or implied) or other representation and assume no responsibility as to the accuracy or suitability of such information for application of the information, since conditions of its use are beyond control of these companies. Sipchem and International VinylAcetate Company shall not bear any liability whatsoever for any loss or damage incurred in connection with the use of this substance.
